THE

ELECTRIC THERMOSTATIC

FIRE ALARM.

THIS is truly one of the most useful inventions of

this inventive age. Where this Alarm is placed it

is utterly impossible for a Fire to pass its incipient

stage and go beyond control.

It is

Automatic in its working,

better than the most faithful watchman, never fails

to give the alarm, is simple and cheap, and can

be available to all owners of property, real and

personal. A single alarm takes its rise in Galien,

which is greatly efficient and certain in giving timely

notice of an approaching fire, and is a great

alarm can be applied to vessels, also, and will be

found very efficient in detecting fire at sea, long be-

fore three on board have any other instrument.

It is an invaluable article for the hotel, and should

always be used for the cure of chapped hands, &c.
